DETAILED ACTION

1. The information disclosure statement (IDS) submitted on 11/20/01 is acknowledged and considered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kepley (6,203,516). Kepley disclose a power supply for a phacoemulsification system as claimed (figs. 8-32). Although, Kepley does not disclose a cutting tip ultrasonically vibrated by an ultrasonic transducer, it is well known in the art that a phacoemulsification includes a cutting tip as claimed in order to disintegrate of lens of an eye. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a cutting tip as claimed into Kepley's phacoemulsification system probe in order to perform a phacoemulsification.
